PROFESSIONAL EXPERIENCE

MVi – Salt Lake City, UT | Applications Support Engineer

MVi/CDi provides SaaS Solutions for Financial Institutions and Municipalities in Electronic Content Management systems, including technical hardware/software deployment, and support

- I created 1,000's of technical case notes & documents that served as a KB for our team.
- Starting in Solutions in 2017, I was brand new to Technical Support, but picked up the products quickly, earned certifications, and advanced to Applications in under 1 year!
- Shortly after being hired, I pointed out a key vulnerability, and offered 2-3 solutions to leadership. Based on my analysis, leadership agreed and I was cross-trained in Technical Hardware, replacing that vulnerability with redundancy.
- With my background in Web Dev and Marketing/UX Design, I was tasked with upgrading our fillable PDF Annual Review form into a dynamic, online form.
- Communicating with customers at all levels of the company from front-line staff to C-Suite Execs, I completed 30+ projects in 2023, securing \$300K+ in contract revenue.
- I conducted onboarding/implementations for many of our 200+ customers where Product Education and Marketing was essential to Technical Hardware/Software adoption.
- I served as a local website resource, responsible for adding documents, and managing updates/menus with UX of company website, using HTML, CSS, PHP and Javascript.
